Ready for digital entertainment?

ASUS, the consistent leader in motherboard technology, teams up with the most popular DVD software innovator to bring you a complete entertainment solution for your PC. Highlighting the multimedia features of your ASUS motherboard are three of the latest Intervideo® DVD software so you can watch, create, and enjoy digital entertainment at its finest.

Minimum system requirements

(Recommended by Intervideo, Inc.)

Check if your system meets the following requirements before you install the Intervideo® WinDVD Suite Platinum.

WinDVD® Platinum 5

CPU Intel® CPU with 350 MHz and MMX, or AMD CPU with 450 MHz and 3D Now!™ · **Memory** 64MB · **Optical drive** DVD-ROM drive · **AGP** Macrovision-compliant graphics card · **Hard disk space** 50MB · **Graphics support** Microsoft® DirectX 8.1 or higher · **Audio** Subsystem that supports 48 KHz stereo playback · **Operating system** Windows® 2000/XP

WinDVD Creator® Platinum 2

CPU Intel® Celeron® 800 MHz or Intel® Pentium® 4 with 1.6GHz or higher for Direct DVD support · **Memory** 128MB · **Optical drive** CD-ROM for installation or DVD-RW/CD-RW for burning DVD/CD · **AGP** Windows®-compatible graphics card · **Hard disk space** 70MB for installation, 620MB for every hour of VCD quality MPEG-1 video, 2GB for every hour of DVD-quality MPEG-2 video · **Audio** Windows®-compatible sound card that supports 48 KHz stereo playback · **Operating system** Windows® 2000/XP

WinRip® 2

CPU Intel® Pentium® 266 MHz · **Memory** 64 MB · **Hard disk space** 20MB for installation, 50MB for temporary music storage · **Audio** Windows®-compatible sound card that supports 48 KHz stereo playback · **Operating system** Windows® 98/98SE/ME/2000 · **Others** Stereo speakers for music playback

Installation is a breeze...

- 1 Place the Intervideo® WinDVD Suite Platinum into the optical drive.
- 2 From the installation window, choose the application that you wish to install.
- 3 Click the Install button to begin the installation. Follow the same installation procedure for the other programs.

The experience begins...

Launch the WinDVD® Platinum 5, WinDVD Creator® Platinum 2, or WinRip® 2 by clicking **Start > All Programs > Intervideo WinDVD/WinDVD Creator 2/WinRip 2**.

Or, simply click the program icons on the Windows® desktop.

WATCH movies as if you were in a theater

InterVideo® WinDVD® Platinum 5 redefines the way to watch DVD movies on your PC. This software brings out the sharpest images and crystal-clear audio on your DVD movies to create a theater-like effect in the convenience of your home.

ASUS motherboards that support Intel® Hyper-Threading Technology are best for WinDVD® Platinum 5. For more information on the benefits of this technology, refer to your ASUS motherboard user guide.

SOUND so superb, it sweeps you off your feet!

WinDVD® Platinum 5 supports the Dolby Digital Sound technology through a 5.1-channel decoder to provide audio equalization and sound effects to your DVD movies.

WinDVD® Platinum 5 comes with the proprietary InterVideo® ICE surround sound processor capable of creating 5.1-channel output from 2-channel sources. The latest ASUS motherboards, such as the P4P800-E Deluxe, support 7.1-channel output, making your movie-watching experience truly enjoyable.

save time...do the TIME STRETCH!

Need to finish a three-hour movie in two-and-a-half hours? WinDVD® Platinum 5 now offers a solution for those who love entertainment but value their time. With the **Time Stretching** feature, you can determine how long or short you want to watch a movie, then adjust the playback speed while maintaining natural audio quality so you don't listen to chipmunks!

peek behind the scenes with MOVIE ENCYCLOPEDIA...

Find out more about the movie you are watching, including information on the cast, direction, and many more. With this feature, you can stop guessing who's who in the film!

CAPTURE scenes, PAN, ZOOM or even WORK while you watch...

Ever heard of multitasking? You can do this, too! While watching a movie, capture your favorite scenes with a mouse click or a keyboard stroke. Add highlights and effects to your captured scenes using the zoom and pan features. And if you get bored, you can open another application and work!

watch!

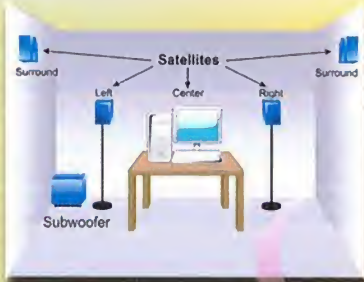

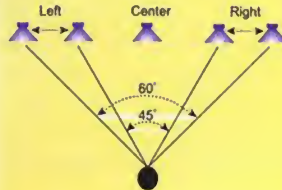

WinDVD® Platinum 5

5.1-CHANNEL audio system setup

Achieve 5.1-channel Dolby Digital sound in few, easy steps...

1 Position your speakers

Arrange your speakers at a narrow angle if you watch movies most of the time. If you listen to music more often, arrange the speakers at a wider angle.

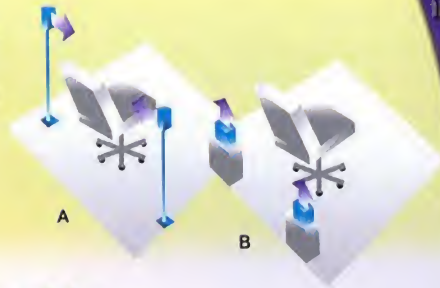

Typical 5.1-channel audio system

Place the surround speakers alongside each other and slightly to the rear (but not directly behind) of the prime seating position. They should be above ear level to minimize localization effects, and aimed directly across the listening area.

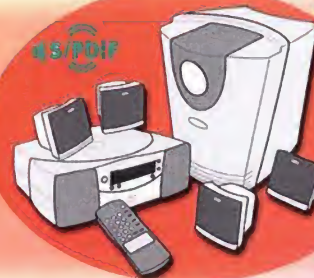

**The information in this section is from Dolby Laboratories, Inc. For more details, visit the Dolby website at <http://www.dolby.com>.*

If you do not have a suitable wall to mount the surround speakers, you can place them on stands (A) or (B) behind you, aimed upwards, at least two feet from the floor.

2 Connect the cables

Most ASUS motherboards come with an onboard 6-channel audio and optional Sony/Philips Digital Interface (S/PDIF) ports. Use the correct type of cable to connect your PC to your audio system.

If your sound system supports the S/PDIF interface, connect your sound system to the PC using an S/PDIF cable. S/PDIF ports may be coaxial and optical. You can use either one to achieve digital audio output.

If you have an analog audio system, connect it to the Line In, Line Out, and Microphone ports on your PC. The audio ports functions may vary on certain motherboard models. Refer to the motherboard documentation for details.

create and share HOME MOVIES in minutes!

Download your video from the camcorder or VCR to your PC.

ASSEMBLE your movie in a flash

Make slide shows using still images. You can also put together video clips in the Time Line using simple drag-and-drop operations.

CHOOSE special effects

Add titles to your movie using customizable templates. Change text and attributes like font, position, and color.

To change scenes gradually, select from 67 transition effects with friendly drag-and-drop tools.

PLAY with sounds...

Drag MP3s right into your videos or add narration. Use the built-in audio mixer to adjust the volume of audio tracks for precise control.

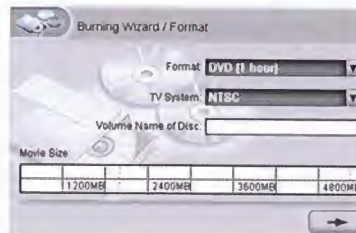

REFINE details

Choose from the 33 special filters to give your video the professional look. You can blur, brighten, color, emboss, mosaic, or shake portions of your video to achieve desired output.

SELECT the video format

Choose your desired media format (DVD, VCD, or SVCD), and the TV system that corresponds to the country where you live (NTSC or PAL).

BURN into a disc and SHARE your movie!

Save your movie in the output format of your choice (DVI, AVI, MPEG1, or MPEG2) and share it with your friends!

Making movies... beginner's class

Capture

Use a digital video camcorder to record your video.

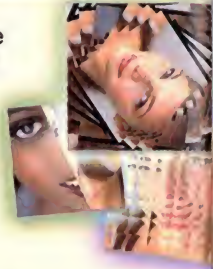

WinDVD Creator® Platinum 2 can also record video from VCRs, USB cameras, televisions, game consoles, and other sources that can be attached to your computer.

Edit

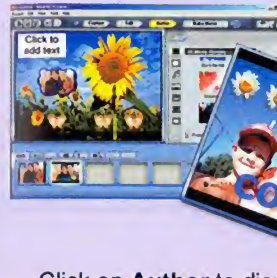

Import files by clicking the **Import** button in the Media Library.

Drag clips to the Storyboard and arrange them according to your desired sequence.

Author

Click on **Author** to display the numbers representing the chapters on your Storyboard.

WinDVD Creator® Platinum 2 lets you create an online table of contents so viewers can quickly view a specific location in your movie.

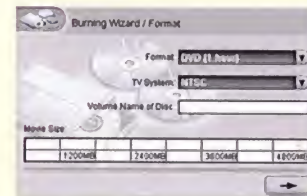

Double-click a theme to edit. The Theme Editor allows you to customize the theme background, modify the font, color, position, and size of the theme's title, and change the button shape.

Make Movie

Click the **Make Movie** button. Choose a media format and the appropriate TV system then click **→**.

Select your CD-RW or DVD-RW device and click **Start**.

WinDVD Creator® Platinum 2 supports all output formats: DVI, AVI, MPEG1, or MPEG2.

Making movies... advanced class

MOTION MENU

Create a Motion Menu like those used in Hollywood Movies by inserting a video clip of your choice to play in the background of your menus and chapter selections. You can even add your favorite song to play in the background at the same time!

add sounds with AUDIO MIXER...

Add up to two extra audio tracks for creating complex audio effects in your movie. You can add special effects such as fade in, fade out, audio mix, and more to highlight special moments in your movie with sound.

MINIMIZE unwanted sounds

Camcorder microphones often pick up sounds like the wind, people talking in the background and even the breathing and fumbling of the person shooting the video. With WinDVD Creator® Platinum 2, you can reduce unwanted sounds, ensuring high quality video capture with minimum background noise.

advanced SCENE EDITING

With advanced scene editing, you can easily edit a video to be exactly as you want it. For example, you can record your favorite TV show and cut out the commercials, or delete sections of your home movie based on Time Line editing.

welcome to your DIGITAL JUKEBOX!

Experience digital music at its best. Enjoy, organize, and expand your music collection for your ultimate listening pleasure. The WinRip® 2 Music Gallery categorizes your music by Artist, Album, and Genre, making it easier to organize and enjoy your music collection.

CONVERT audio files to other formats

Use the Music Gallery's Record option to convert files from MP3 to other formats, such as WAV, MIDI, WMA, or CD playback.

ACHIEVE 5.1-channel output from 2-channel sources

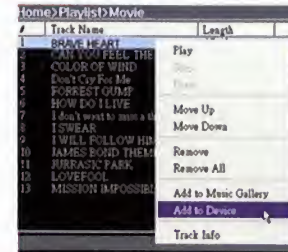

Intervideo's proprietary ICE surround sound can create 5.1 channel output from 2-channel sources so you get nothing less than superb sound.

CD-quality audio

Add your favorite tracks to the playlist to create your personal selection. Burn MP3, WMA, and WAV music files into a CD.

LISTEN to and DOWNLOAD Internet streaming audio files

Get unlimited music from the Internet by MP3 streaming. Select songs and save them to your PC.

TAILOR-MADE audio playback for best sound

Create your own Karaoke machine or choose from Echo, Surround, or Preset Equalizations to enhance your music for various listening environments.

ASUS®
